

Making Reliability a Reality

Our customers are in different industries, managing different demands, striving toward different goals, and facing different challenges. Yet, they all need the same thing to achieve success.

Innovation and reliability.

That's why they turn to Miles Technologies. No matter what your business requires, we've got your printing needs covered with Zebra printing solutions.

Frustration: Unreliable self-service printers

Solution: Zebra's Embedded/Kiosk Printers

Save time, supplies and aggravation with Zebra's Kiosk printers!

- **Reliable:** Kiosk printers' direct thermal printing technology does not use toners or ribbons, eliminating the risk of ink spills, ribbon jams, and tears.
- **Even MORE Reliable:** Kiosk printers do not present paper to the customer until printing is finished, eliminating the risk of paper jams.
- **Time-Saving:** Since paper is the only consumable, these direct thermal printers are restocked less often and can also send automatic "low-paper" alerts to cell phones for proactive management.
- **Durable:** These printers are built to endure thousands of customers each day as well as harsh, heavily trafficked environments, providing you with unmatched durability.
- **Simple:** As a customer-facing application, these printers are extremely easy to use and proven to improve customer satisfaction on an average of 58%.

Frustration: High-performance printers that don’t live up to their name.

Solution: Zebra’s New Xi4 Printer Series

In addition to the superior quality that Xi printers are known for, this upgraded series includes:

- 40% faster print speeds, making it one of the fastest technologies on the market
- 66% faster 10/100 Ethernet data transfer
- Advanced early warning systems for reduced downtime and enhanced reliability
- Advanced LCD content and navigation, customizable to your needs

110Xi4 Printer	140Xi4 Printer	170Xi4 Printer	220Xi4 Printer
4-inch printer 14-ips print speed	5-inch printer 14-ips print speed	6-inch printer 8-ips print speed	8-inch printer 10-ips print speed
Ideal for a wide variety of applications (from circuit boards to vials/slides)	Ideal for high-volume applications with 24-hour duty cycles	Ideal for tough applications such as compliance labels	Ideal for industrial applications such as chemical drum ID labels

Frustration: Wristband printers that fade or smudge, reducing readability and compromising patient safety.

Solution: Zebra’s HC100 Printer

Patient care starts at the wrist—and this cost-effective printer is the foundation of it all.

- **Reliable:** Bar codes remain scannable longer than the average patient stay, even after repeated use and extended treatment.
- **Safe:** Antimicrobial coating protects against leading causes of hospital infections, including *E. coli*, *S. aureus*, *P. aeruginosa* and MSRA Type II, III, and IV.
- **Simple:** No need to fuss with loading forms, handwriting special details, or folding laminates. The HC100 automatically calibrates to the appropriate wristband size and prints the complete wristband in a single step.

- **Durable:** Impact-resistant plastic and solvent-resistant bar codes allow the HC100 to withstand the day-to-day activities of the healthcare industry.
- **Low maintenance costs:** The HC100's advanced design and engineering eliminates expensive adhesive problems such as oozing.

Frustration: ID card printers that lack quality, durability, ease of use — or all three!

Solution: Zebra's QuikCard Technologies

This simple, all-in-one bundle will have you printing high-quality, full-color, professional ID cards within minutes. The value-packed kit includes:

- Your choice of the single-sided (P110i) or double-sided (P120i) **card printer**, available with or without magnetic stripe encoding
- **Exclusive design software** with customizable templates for cards, including company IDs, visitor passes, retail loyalty cards, membership cards, and more
- Optional **professional design software upgrades** with expanded design, database, and security features
- The easy-to-install **Logitech 3000 USB Webcam** and mini tripod for capturing professional photos
- **200 cards**
- **2-year limited warranty**

Print in-house, on-demand IDs for any industry and any purpose with the confidence that you're getting top-notch security and convenience that you can't find anywhere else.

Frustration: Card printer has limited capabilities

Solution: Zebra's Card Printers

Single-sided printers? Double-sided printers? Lamination? No matter what your specific needs, the perfect card printer lies within the lines of Zebra’s durable card printers.

The Value Line. When you have little space and high expectations, Zebra’s compact Value printers are the solution. The sleek, space-saving design makes these printers ideal for countertops and desks while providing you with the superior printing quality you need—all with affordability at the forefront.
